هذا الملف يحتوي على:

كوزين 10 اسئلة + نموذج ميد 1 (13 سؤال) + نموذج ميد 2 (19 سؤال) + نموذج ميد 3 (مهم جداً تحله ~ تقريباً 14 سؤال) = 56 سؤال، مع التكرار نخصم 6 نقول 50، بالتوفيق.

هنا كوزين 10 اسئلة، من المنسق عن شبت:

Chapter 2 – Digital Domain:

Question 1

1 points

✓ Saved

Our senses only deal with

- ☐ Digital Domain
- ☒ Analog Domain
- ☐ Digital Electrical Signal
- ☐ Digital and Analogue Domain

⚠ Moving to another question will save this response.

Question 1 of 5 > >>

Question 2

1 points

Save Answer

The Digital signal is any signal that is

- ☐ Contentious
- ☐ Has infinite level of amplitudes
- ☒ Discrete
- ☐ None of the above

⚠ Moving to another question will save this response.

<< Question 2 of 5 >>

Question 3

1 points

✓ Saved

It is always easier to remove noise from than it is from

- ☐ Analog signals, digital signals
- ☒ Digital signals, analog signals
- ☐ Mechanical signals, digital signals
- ☐ None of the above

⚠ Moving to another question will save this response.

<< Question 3 of 5 >>

Question 4

1 points

✓ Saved

...is representation of numbers, text, sound and image as combination of two fundamental logic symbols; one and zero.

- ☐ Analog Information
- ☐ Transistor
- ☒ Digital Information
- ☐ None of the above

Question 5

1 points

Save Answer

Which technology used to fabricate large number of transistors in a thin layer of semiconductor material?

- ☐ Transistor
- ☒ Integrated Circuit
- ☐ Speaker
- ☐ All of the above

Quiz – Chapter 3, Internet & WWW:

Question 1

1 points

✓ Saved

Wiki is Internet equivalent of a journal or diary where the bloggers post opinions.

- ☐ True
- ☒ False

→ ⚠ Moving to another question will save this response.

Question 1 of 5 > >

الإجابة الصحيحة هي ال ^

blog instead of wiki

Question 2

1 points

⏸ Saving Answer

..... handles the address part of each packet so that it gets to the right destination.

IP

→ ⚠ Moving to another question will save this response.

< < Question 2 of 5 > >

Internet protocol – IP:

هو يحط عناوين لكل الباكس ..

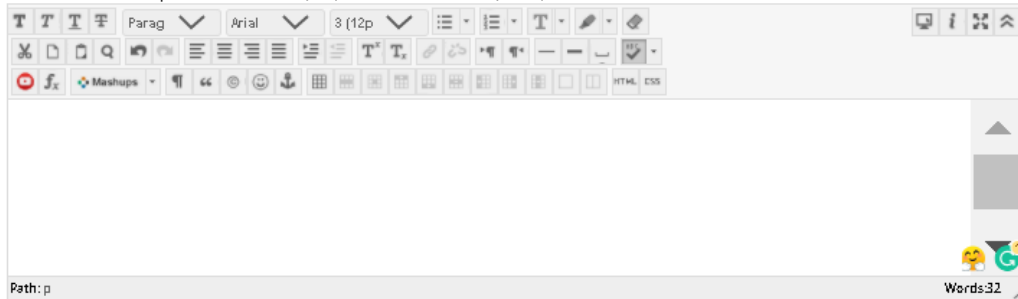

Question 3

1 points

✓ Saved

What is the difference between Web and the Internet?

For the toolbar, press ALT+F10 (PC) or ALT+FN+F10 (Mac).

Internet → Transport information

Web → has information + web works on the Internet

Question 4

.....maintain the Internet Backbone

Network Service Providers

⚠ Moving to another question will save this response.

Network Service Providers – NSP

Question 5

1 points

Save Answer

..... uses link to connect to additional related information

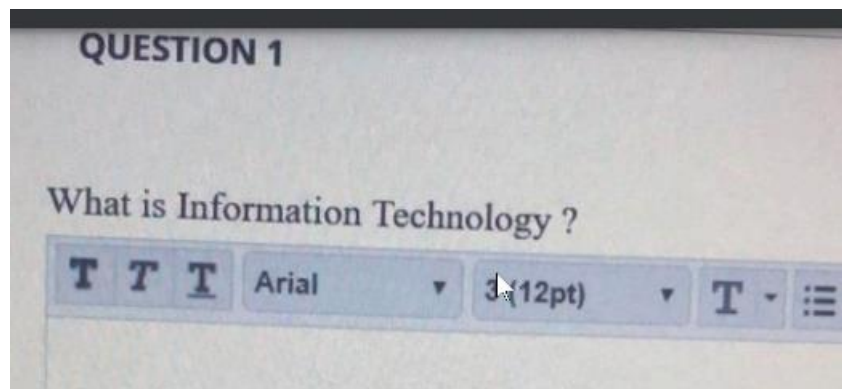

Hypertext

⚠ Click **Submit** to complete this assessment.

⏪ ⏩ Question 5 of 5

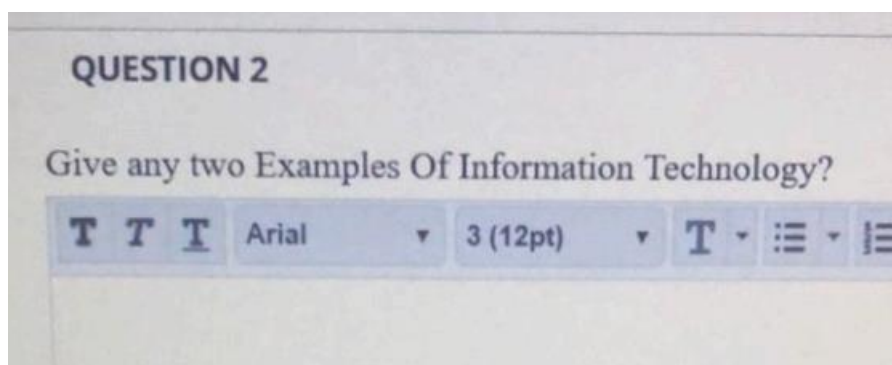

Save and Submit

MID EXAM 2019 (ONLINE):

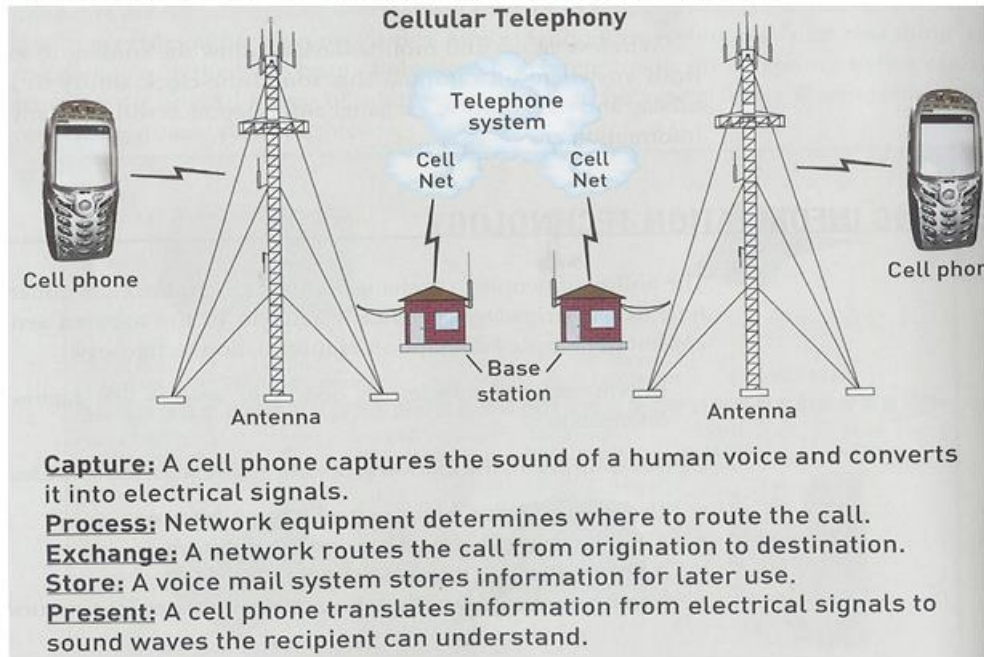

**DEFINING INFORMATION
TECHNOLOGY**

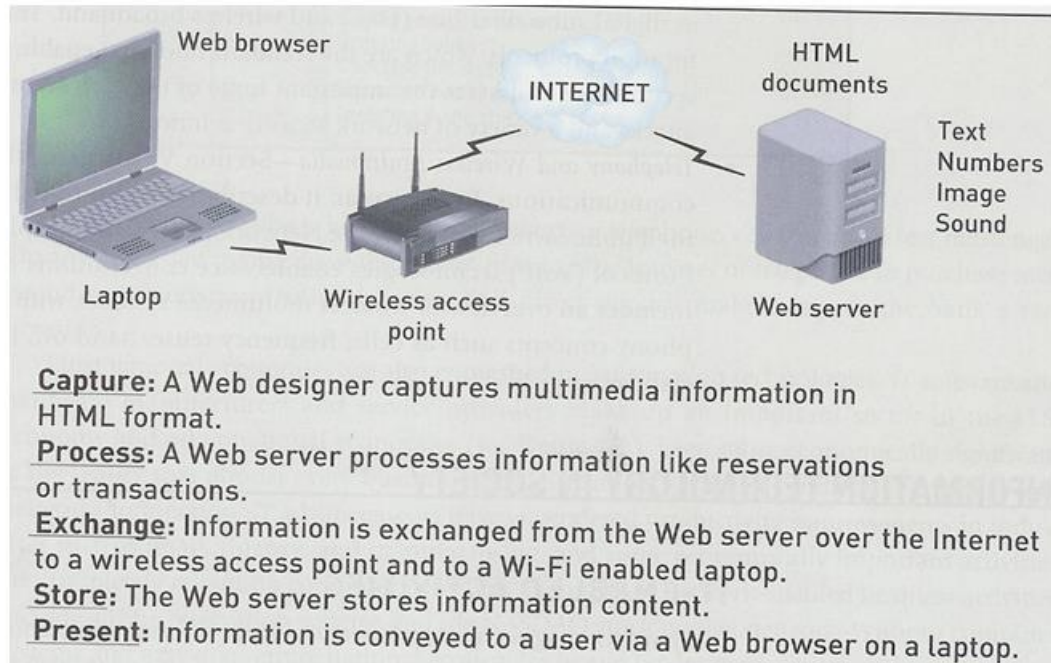

Information Technologies are systems of hardware and/or software that capture, process, exchange, store and/or present information using electrical, magnetic and/or electromagnetic energy.

IT EXAMPLE: CELLULAR TELEPHONY

IT EXAMPLE: WIRELESS INTERNET

ترا ماهو قرآن تصمها صم، افهم الـ
capture, process, exchange, present
واعطي امثلة من عندك .. وهتجي صح ..

QUESTION 3

Explain the difference between Web Browser and Web Server ?

T T T Arial 3 (12pt) T T T T

- **Web browser**

- Program that displays Web pages ;

- **Web servers**

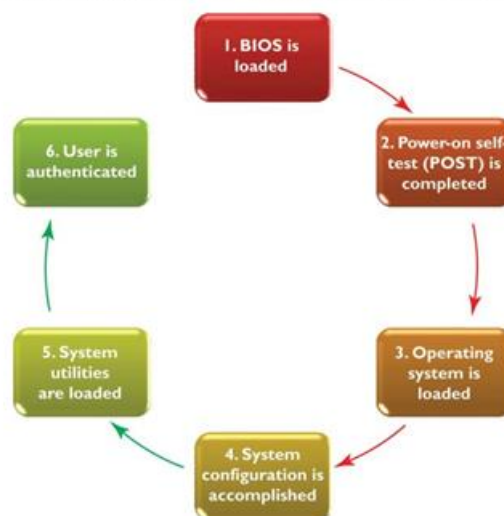

- Web sites and their associated information are stored here

QUESTION 4

What are the Steps of Booting a System? and describe any two steps of them?

T T T Arial 3 (12pt) T T T T

The Six Steps of Booting a System

عاد الشرح افتي له من كيسك، واصلا اسم كل ستيب يعبر عن وظيفتها ..

QUESTION 5

If 1000 bits are transmitted in 1 second over a copper wire to a secondary unit in a car, what is the data rate and the bit period in this case.

T T T Arial 3 (12pt) T - - - - -

Data Rate

- ▶ The rate at which bits are sent out over a transmission medium
- ▶ Measured in terms of bits per second (bps) and bit period in terms of seconds.
- ▶ Bit period (T) measures the ON or OFF time in seconds.
- ▶ Therefore; $R = 1/T$ bps
- ▶ Example : for $T = 1 \text{ ms}$, $R = 1000 \text{ bps}$

الحل:

المعطيات التي عندنا جاهزة من السؤال هي،

Date Rate = $R = 1000$ bits per second

هذا حل المطلوب الأول:

$$R = 1000 \text{ bps}$$

المطلوب الثاني:

$$T = ???$$

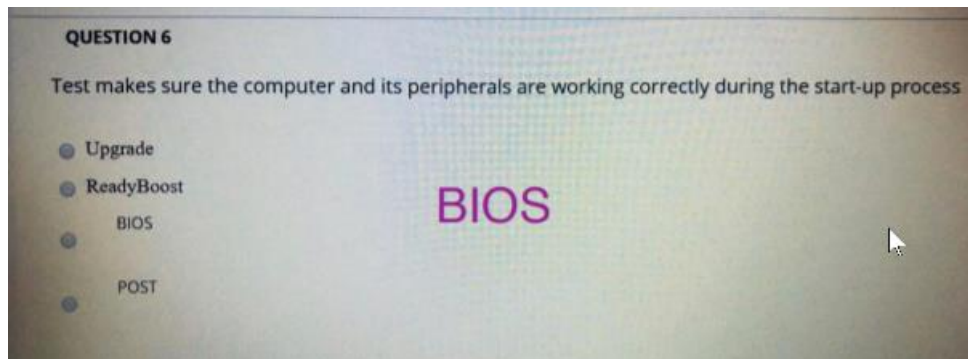

$$R = 1/T$$

$$R \times T = 1$$

$$T = 1/R$$

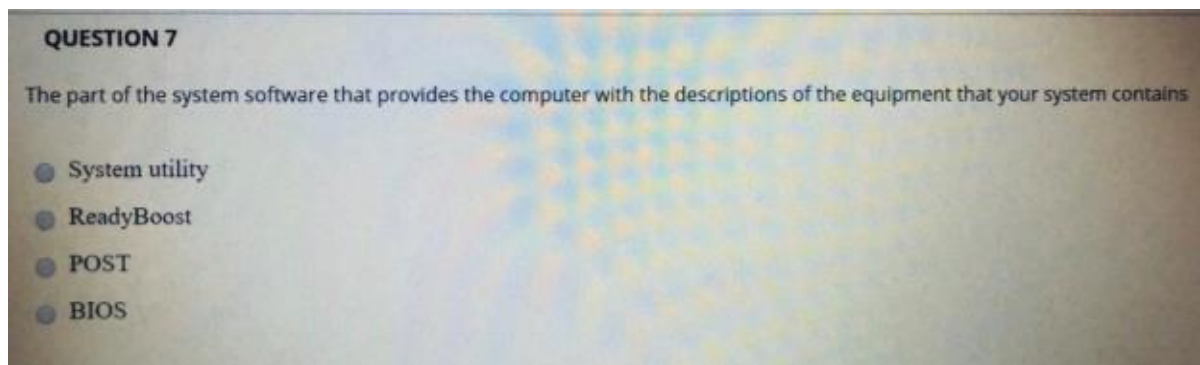

$$T = 1/1000 \text{ sec}$$

$$T = 1 \text{ ms}$$

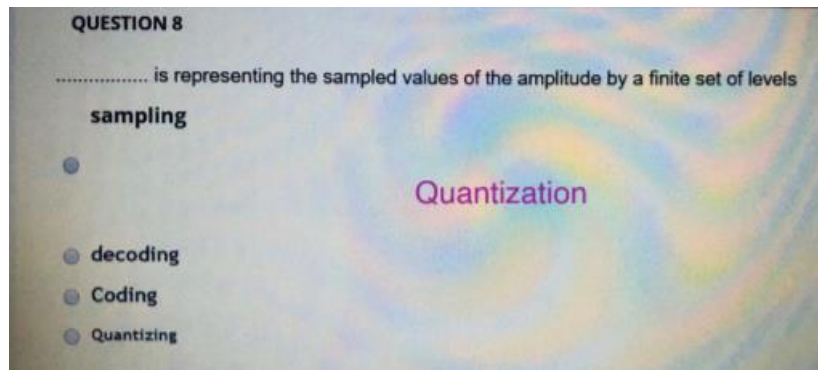

- **Read-only memory (ROM)**

- Contains prerecorded instructions to start the computer
- Nonvolatile—contents stored when CPU power off
 - **Basic input/output system (BIOS)**
 - First code run when the system is powered on
 - **Bootstrap loader**
 - Program—locates and loads the operating system into RAM
 - **Complementary metal-oxide semiconductor (CMOS)**
 - Starts the power-on self-test and verifies other system components are operating correctly
 - **Power-on self-test (POST)**
 - Checks circuitry and RAM, marking defective locations

- **System software**

- Consists of all the programs that enable the computer and its peripheral devices to function smoothly
- Divided into two main categories:
 - The operating system
 - System utilities (utility programs)

واضحة يمثل السامبلز بـ

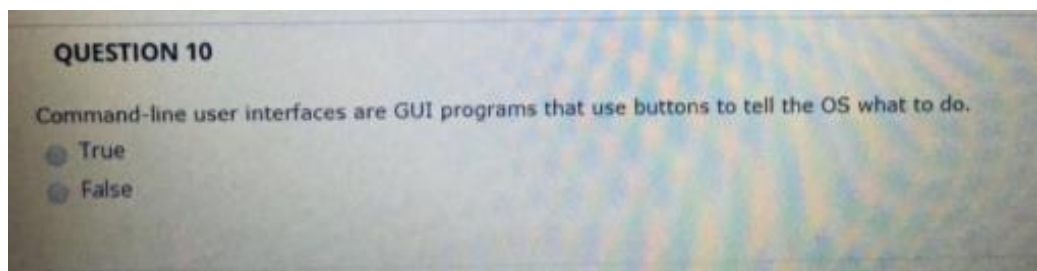

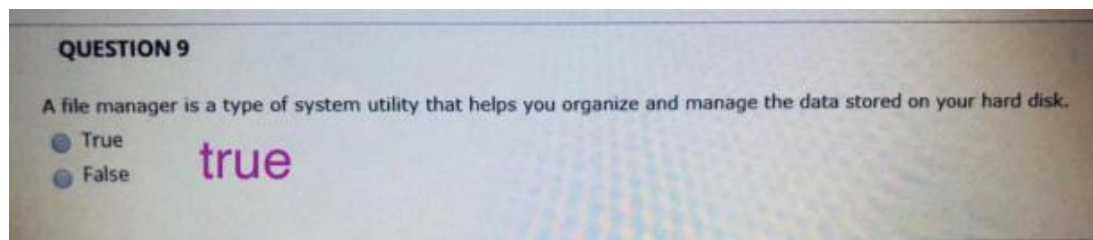

levels

-

وإذا بنتكلم عن الـ

encoding:

converting the levels to machine code → ex 01010101

اظن غلط، تقلي ليه اقلك لأن الكوماند لاين من اسمه يستخدم

عشان تسوي

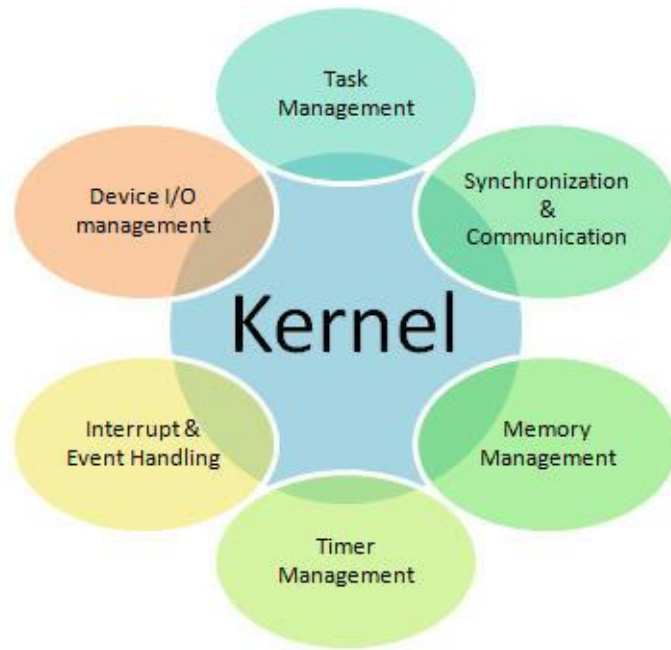

access to the web serve

QUESTION 13

what is the central part of the OS that consists of the instructions that control the actions the OS uses most frequently?

T T T Arial 3 (12pt) T - - - - -

the kernel

MID EXAM 2019 (حضورى):

5 مقارنات مقالي:

مقارنات

Spiders & search engine

Sampling & quantizing

Analogue & digital

routers & network point server

fragmented disk & defragmented

حل الأول:

• Search engines

- Index databases of Web pages to enable fast information searches

• Spiders

- Programs that roam the Web to add new Web pages to search engine indexes

فكرة السبايدر انها برامج، المهم تفرفر الويب عشان تضيف الصفحات الجديدة للبيس
حققت محركات البحث، قوغل على سبيل المثال ..

حل الثاني:

Three steps of digitization

- ▶ **Sampling** the ~~analog signal~~ (conversion from analogue to discrete)
- ▶ **Quantizing** (rounding off voltage value to the nearest level)
- ▶ **Coding** (Assigning a binary code to each sample)

حل الثالث:

- ▶ The **analogue signal** is any signal that is:
 - Continuous
 - Has an infinite level of amplitudes
 - More exact values, but difficult to work with
 - An analog signal can be any time-varying signal
 - Minimum and maximum values can be either positive or negative.
 - They can be periodic (repeating) or non-periodic.

Digital signal:

- ▶ Uses discrete or discontinuous values to represent information
- ▶ Finite range of values
- ▶ Stored in the form of binary bits, 0 or 1
- ▶ Denoted by square waves
- ▶ Not as exact as analog signal, but easier to work with
- ▶ Their minimum value must be 0 volts, and their maximum value must be 5 volts
- ▶ They can be periodic (repeating) or non-periodic

حل الرابع:

- **Network access points (NAPs)**

- How NSPs are linked
- NAPs allow data to start on one network, then cross over to another network

- **Routers**

- Specialized devices that connect networks, locate the best path of transmission, and ensure that data reaches its destination

حل الخامس:

- **Fragmented disk**—results from computer creating and erasing files on hard disk
 - Causes disk access to slow while system looks in several locations to find all file segments
- **Disk defragmentation programs**—reorganize stored data in a more efficient manner

نموذج ميد 3:

CLO 1 - SO (j)

3.5
3.5

Question # 1.

a. Define Information Technology. Explain IT with an example? (2 marks)

IT's System hardware & Software that capture
Process, extending, Storage, Present.

Use tools/techniques/machine to process data
and make ^{anything} ease.

Ex) Cell Phone:

Capture: take a capture of sound and convert to
electrical signal.

Process: here determine the Path and destination

extending: be sure that it's in its destination.

Storage: Save information for next time.

Present: convert the electrical signal to human voice.

b. Based on the information processing cycle, analyse how Email system works? (1.5 marks)

Input: write a message on anything

Process: Send it to receiver by know it's address
and its transfer to him.

Output: Display ^{email} message from receiver

Storage: Save that email. ~~to~~ back when
you want.

Question #2.

a. Differentiate between analogue and digital information. (1 mark)

analogue	digital
Continuous	Discrete
Infinite Value	Finite Value
Maximum value and minimum can be: Positive or negative	Maximum value denoted as 5 Volts Minimum value denoted as 1 Volt

b. Mention the steps for digitizing analogue information? (1 mark)

- 1- Sampling
- 2- Quantization
- 3- Coding (Encoding/decoding)

c. Explain the following. (2 marks)

a. The digital information can be transmitted at higher speed than analogue information.

Digital information it's use binary digit not like Analogue, and that make it easy to transmitted.

like use: CDs, Flash...

b. The digital information is amenable to compression than analogue one.

Digital it's have it quality when compression more than analogue becas it's discrete value.

Due to regularization.

Question #3.

a. Differentiate between the Internet and the Web? (1 mark)

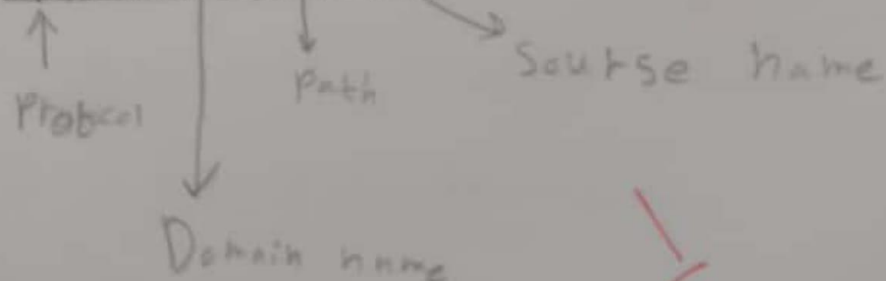

Internet (Net)	World Wide Web (WWW) Web
transfer information	Part of internet
have 250 million Hosts;	Contains information
it's universal system of computers and networks	

b. What does FTP protocol stands for, and what is its use? (1 mark)

FTP: File Transfer Protocol

Use it when you want to transfer files. It's keep it and make it secure.

c. Identify components of the following URL? (1 mark)

<https://fcit.kau.edu.sa/aims/home.php>

✓ d. Define Netiquette and E-Commerce. (1 mark)

Netiquette: guideline and how to be good when dealing with people and users.

E-commerce: it's like a shop but in internet that make everyone buy and sales.
C2C, B2B, C2B, ...

HVCLO 4- SO(m)

Question # 4.

3
3.5

a. What is Operating System? List FIVE basic functions of operating system. (2 marks)

OS: It's set of programs enable computer to function smoothly.

1- Start Computer

2- Manage Application

3- " Memory

4- Handle input & output device mass

5- Provide user interface.

b. Define the following terms with regards to operating system. (1.5 marks)

a. Interrupt

1) when program shutdown.

? CMC

b. User interface

that what user handel with
and what he see.

c. Utility: it's help operating system to deal
system programs that like:

Backup
initialization
finding file
