

Question 1

What is the value of the following Lisp expression:

```
(* (+ 9 5) 10)
```

Question 2

Which of the following is not a primitive data type for C programming language?

- ☐ float
- ☒ boolean
- ☐ integer
- ☐ char

Question 3

Given the following piece of code of C language:

```
int c = -3%5;
```

what is the value of c?

Question 4

Find the output of the following C language code :

```
#include "stdio.h"

union data{
    struct Bits{
        unsigned int x1:1;
        unsigned int x2:1;
        unsigned int x3:1;
    }bits;
    int y:3;
};

void main()
{
    union data d1;
    d1.y = 7;
    d1.bits.x2 = 0;
    printf("%d ", d1.y);
}
```

-3

Question 5

Given the following piece of code of C language:

```
int x= 3;

if (x=1)
    printf("%d", x+1);
else
    printf("%d", x-1);
```

What is the output?

2

Question 6

Given the following piece of code of C language:

```
#include <stdio.h>
int main(void) {
    int x=26;

    int y = (x=0 && x++/3);

    printf("%d\n", x);

    return 0;
}
```

What is the output ?

Question 7

Given the following piece of code of C language:

```
float f = 80/15;
```

what is the value of f?

Question 8

Given the following piece of code of Perl language:

```
$c= -1%5;
```

what is the value of \$c?

Question 9

What is the value of x in the following Python expression:

```
x = 13 // 3
```

Question 10

What is the value of x in the following Python expression:

```
x = 29 if 8 > 81 else 29
```

Question 11

Which of the following is not an ordinal data type for Java programming language?

- ☒ float
- ☐ integer
- ☐ char
- ☐ boolean

Question 12

Given the following piece of code of C language:

```
#include <stdio.h>
int main(void) {
    int x=178;

    int y = (3>? && x++/3);

    printf("%d\n", x);

    return 0;
}
```

What is the output ?

Question 13

The following Ada program runs normally and does not generate an error:

```
type color is (red, blue, green, white, black);
subtype bicolor is Days range white..black;
c1: color;
c2: bicolor;
c2 := c1;
```

- ☐ True
☒ False

Question 14

What is the value of x in the following Pascal expression:

```
x := 30 div 8;
```

Question 15

1. For Python programming language, give the output of **findall** regular expression function with `<div>(.*?)</div>` parameter for the string `S1`
`S1 = '<div>Article title </div><div><main> text body </main></div>'`

- ☐ ['Article title', 'text body']
- ☐ ['<div>Article title </div>', '<div><main> text body </main></div>']
- ☒ ['Article title', '<main> text body<main> ']
- ☐ ['Article title']

Question 16

What does the regular expression function **search** do in Python programming language?

- ☐ such a function does not exist
- ☐ matches a pattern at the start of the string
- ☐ matches a pattern at the end of the string
- ☒ matches a pattern at any position in the string

Question 17

What is the value of the following APL expression:

$10*3+2$

50

هي المفروض تكون 100000
الكومبايلر بالنسبة يقول 100000
والسلايدات تقول 50
انت حط 100000 وتوكل على الله

Question 18

What is the value of the following Matlab expression:

`2^3^0`

Question 19

Given the following piece of code of Python:

`a,b,c= 15*3,15**79, 15 -3`

what is the value of c?

Question 20

Given the following piece of code of C language:

```
#include <stdio.h>
int main(void) {
    int x=101;

    int y = (x>0 || x++/3);

    printf("%d\n", x);

    return 0;
}
```

What is the output ?

Question 21

The above C declaration defines **p** to be :

```
struct node {  
    int x;  
    float y; };  
struct node p[10];
```

- ☐ A structure of 2 fields, each field being an array of 10 elements
- ☐ A structure of 10 fields, each field being an array of 2 elements
- ☐ An array, each element of which is a structure of type node
- ☒ An array, each element of which is a pointer to a structure of type node

Question 22

What is the value of the following Ada expression:

```
integer(53.99)
```

Question 23

What is the value of the following Python expression:

```
2**3**0
```

Question 24

What is the value of the following C expression:

`39>32>70`

Question 25

Given the following piece of code of C language:

`int c= 23%7;`

what is the value of c?
